[Création d'un Job Maven](#)

 Université Lille1 <small>Sciences et Technologies</small>	Qualité du logiciel	Intégration continue
Latest update : 12/02/2013	Manuel développeur	Current doc version : 2.0

Pré-requis

- Pour faire fonctionner Jenkins, la seule contrainte est de disposer d'une JVM sur le serveur d'installation (Java 5 ou supérieur est requis). N'oubliez pas de configurer votre variable d'environnement JAVA_HOME.
- Installer un serveur d'application comme tomcat : <http://tomcat.apache.org/>. N'oubliez pas de configurer votre variable d'environnement TOMCAT_HOME, CATALINA_HOME.
- Disposer d'un projet Java disposant d'un cycle de vie Maven sur lequel on souhaite lier un processus d'intégration continue avec Jenkins.

 Université Lille1 Sciences et Technologies	Qualité du logiciel	Intégration continue
Latest update : 12/02/2013	Manuel développeur	Current doc version : 2.0

Installation d'un outil d'IC Open Source : Jenkins

Cet outil d'intégration continue Open Source peut être téléchargé sur ici : <http://jenkins-ci.org/>
Le plus simple reste le déploiement de Jenkins sur un serveur d'application tel que Apache Tomcat via la distribution sous forme de web archive (.war) disponible sur le site ci-dessus.

Applications				
Chemin	Nom d'affichage	Fonctionnelle	Sessions	Commandes
/	Welcome to Tomcat	true	0	Démarrer Arrêter Recharger Retirer <input type="button" value="Expirer les sessions"/> inactives depuis ≥ 30 minutes

Latest update : 12/02/2013	Manuel développeur	Current doc version : 2.0

Configuration de Jenkins

Ensuite, il faut configurer votre serveur Jenkins dans le menu :
Jenkins > Administrer Jenkins > Configurer le système

The screenshot shows the Jenkins configuration interface. At the top, there's a search bar and a 'Jenkins' logo. Below the navigation bar, the 'configuration' tab is selected. On the left, there's a sidebar with links like 'Nouveau Job', 'Utilisateurs', 'Historique des constructions', 'Relations entre les projets', 'Vérifier les empreintes numériques', and 'Administrer Jenkins'. The main content area is titled 'configuration' and shows various settings:

- Répertoire Home**: /Users/tarik/.jenkins
- Message du système**: A large text area for system messages.
- Aperçu**: A section for previewing the configuration.
- Nb d'exécuteurs**: 2
- Période d'attente**: 5
- Nombre de tentatives de checkout SCM**: 0
- Restrict project naming**: ☐
- Propriétés globales**:
 - Emplacement des outils**: ☐
 - Variables d'environnement**: ☐
- JDK**: A button 'JDK installations...' is visible.
- Ant**: A button 'Ant installations...' is visible.
- Maven**: A button 'Maven installations...' is visible.
- Configuration des projets Maven**: A dropdown menu for 'MAVEN_OPTS global' is set to '▼'.

At the bottom, there are buttons for 'Enregistrer' (Save) and 'Apply'.

 Université Lille1 Sciences et Technologies	Qualité du logiciel	Intégration continue
Latest update : 12/02/2013	Manuel développeur	Current doc version : 2.0

Ensuite configurer les chemins de votre JDK, Ant et Maven sur la configuration de Jenkins.

Création d'un Job Maven

Toujours sur l'interface de Jenkins, accéder au menu de création d'un Nouveau Job.

Jenkins rechercher

Jenkins > Tous

Nouveau Job

Utilisateurs

Historique des constructions

Relations entre les projets

Vérifier les empreintes numériques

Administrer Jenkins

File d'attente des constructions

File d'attente des constructions vide

État du lanceur de constructions

#	Statut
1	En attente
2	En attente

Nom du Job

☐ Construire un projet free-style

Ceci est la fonction principale de Hudson qui sert à build (construire) votre projet. Vous pouvez intégrer tous les outils de gestion de version avec tous les systèmes de build. Il est même possible d'utiliser Hudson pour tout autre chose qu'un build logiciel.

☒ Construire un projet maven2/3

Construit un projet avec maven2/3. Jenkins utilise directement vos fichiers POM et diminue radicalement l'effort de configuration. Cette fonctionnalité est encore en bêta mais elle est disponible afin d'obtenir vos retours.

☐ Construire un projet multi-configuration

Adapté aux projets qui nécessitent un grand nombre de configurations différentes, comme des environnements de test multiples, des binaires spécifiques à une plateforme, etc.

☐ Contrôler un job externe

Ce type de tâche permet de suivre l'exécution d'un process lancé en dehors de Hudson, même sur une machine distante. Cette option permet l'utilisation de Hudson comme tableau de bord de votre environnement d'automatisation. Voir la [documentation](#) pour plus de détails.

☐ Copier un Job existant

Copier à partir de

OK

[Aidez-nous à traduire cette page](#) Page générée le : 25 févr. 2013 15:01:36 [REST API](#) [Jenkins ver. 1.501](#)

En supposant, que vous souhaitez établir un processus d'IC sur votre projet Maven disposant d'un pom.xml, sélectionner **Construire un projet maven2/3**.

Une fois votre job créé et associé à votre projet maven et votre SVN, cliquez dessus pour accéder à son interface de lancement.

Jenkins rechercher

Jenkins > Tous > WordcountJob ENABLE AUTO REFRESH

Projet WordcountJob

The wordcount project is an application that provide many services for word counting in a text loading from the file system or from an url.

 Université Lille1 Sciences et Technologies	Qualité du logiciel	Intégration continue
Latest update : 12/02/2013	Manuel développeur	Current doc version : 2.0

Vous pouvez maintenant lancer le job en cliquant sur **“lancer un build”**.

Vous devez obtenir au niveau de la sortie console sur le menu à gauche du job lancé une trace de sortie.

The screenshot shows the Jenkins web interface. On the left is a sidebar with navigation links: [Retour au Projet](#), [Statut](#), [Changements](#), [Sortie Console](#) (selected), [Version texte simple](#), [Informations du Build](#), [Supprimer cette construction](#), [Taquer ce build](#), [Résultats des tests](#), [Voir les empreintes numériques](#), and [Construction précédente](#). The main area is titled 'Sortie Console' and displays the console output for 'WordcountJob'.

Jenkins va alors prendre en compte d'éventuels update de votre SVN, puis il va ensuite exécuter les goals maven un par un, les tests unitaires et les tests d'integration et se terminer par un FINISH SUCCESS.

Ajoutez d'autres emplacements...

Check-out Strategy

Use 'svn update' as much as possible

Use 'svn update' whenever possible, making the build faster. But this causes the artifacts from the previous build to remain when a new build starts.

Navigateur de la base de code

(Auto)

Avancé...

Ce qui déclenche le build

☒ Lance un build à chaque fois qu'une dépendance SNAPSHOT est construite

☐ Construire à la suite d'autres projets (projets en amont)

☐ Construire périodiquement

☒ Scrutation de l'outil de gestion de version

Planning

15 16 25 2 *

Ici, j'ai choisi une "crontab" fixé à 16h15 le 25 février par exemple.

 Université Lille1 Sciences et Technologies	Qualité du logiciel	Intégration continue
Latest update : 12/02/2013	Manuel développeur	Current doc version : 2.0

On retrouvera ensuite après le commit, la dernière révision qui a été exécuté correctement par le job configuré ainsi avec le commentaire du commit fait par le développeur :

The screenshot shows the Jenkins web interface for a project named 'wordcount'. The main heading is 'Compilation #8 (25 févr. 2013 16:06:35)'. The build status is 'Révision: 4 Changements'. The build was triggered by a change in the code base. The build log shows the following modules and their execution times:

Module	Time
palindrome-business	1,3 s
wordcount-business	6,1 s
Maven	1,4 s
wordcount-webapp Maven Webapp	1 mn 6 s

The interface also includes a sidebar with links to various build features and a footer with the page generation date and Jenkins version (1.501).

Fin du tutoriel.
